

Health Science Students' Association

University of Saskatchewan

I-PASS '09 – September 2009

The Inter-Professional Annual Students' Symposium is a one-day conference for all of our first-year health science students in the Colleges of Dentistry, Medicine, Nursing, Pharmacy & Nutrition, Physical Therapy, and Veterinary Medicine. This conference is an introduction to interprofessional collaboration for the newest members of our health science colleges. It addresses current Saskatchewan health service issues and highlights collaborative solutions throughout the province. The conference also creates an atmosphere for students to build relationships they can foster throughout their academic and future careers.

Medicomania – November 2009

Medicomania is a variety night performed by health science students for other students and faculty at the University of Saskatchewan as well as community members in Saskatoon. The event has two unique performances held at a local historical theatre. The acts are a variety of music (instrumental, vocal, and combinations of both), dance (everything from hip hop to Bhangra), and comedy (video and live performances). All of the proceeds from this event are donated to our charity of the year.

Malpractice Mixer – January 2010

The Malpractice Mixer is social event at the beginning of our second semester. This pub-crawl is guaranteed to be a blast and brings together students from across our campus. The students start off the night with a white t-shirt and hopefully end the night with colours from all of the Colleges!

BBIF – March 2010

Building Bridges Interdisciplinary Forum is an annual event highlighting a topic that is applicable to all of our health science colleges. Last year's theme was patient safety; this year we are addressing the health of health service providers.
